

Manual

DOMATEAM: TvLink TXP868

Coding based on a remote control already in operation.

Take a remote control already in operation and a new remote control and do the programming near the receiver

- 1) Press the hidden button on the remote control already in use. The receiver emits a short beep.
- 2) Press one of the buttons on the remote control already in use. The receiver beeps short: the receiver goes into "memorization" mode for 5 seconds.
- 3) Enter a new remote control and press the button to memorize. The receiver emits short beeps confirming the registration of the new remote control.
